

NCF BOOSTER & NCF BOOSTER-SIGNAL

Furutech introduces a new duo of award-winning connector and cable holders .

FURUTECH
Audio Transmission
NCF

Incorporated into selected Furutech products, NCF features a special crystalline material that has two 'active' properties. First, it generates negative ions that eliminate static. Second, it converts thermal energy into far infrared. Furutech combines this remarkable material with nano-sized ceramic particles and carbon powder for their additional 'piezoelectric effect' damping properties. The resulting Nano Crystal² Formula is the ultimate electrical and mechanical damping material. Created by Furutech, it is found exclusively in Furutech products.

Features and Materials:

- Multi-material Hybrid Construction – Furutech Design
- Support unit: Audio grade ABS resin and NCF Nylon resin - eliminating static charge.
- Top restrain unit: Stainless block and Audio grade NCF Nylon resin
- Base unit: Audio grade ABS resin body with Slip-proof, shock-absorbing plate with counterweight.

NEW NCF BOOSTER & NCF BOOSTER-SIGNAL

Furutech introduces a new duo of award-winning connector and cable holders featuring Furutech's revolutionary damping material, NCF (Nano Crystal² Formula).

Designed and developed by Furutech, the NCF Booster and NCF Booster Signal provide the ultimate connector and cable damping solution.

The NCF Booster elevates power cables and supports power connectors, allowing optimum alignment between connector and socket at both component and wall outlet ends. At the same time it cleverly boosts cable and connector performance by damping mechanical and electrical vibrations and eliminating static charge, thanks to Furutech's proprietary NCF (Nano Crystal² Formula).

The NCF Booster Signal provides the same support for RCA, XLR and HDMI connections between components, as well as providing elevation for smaller cables such as speaker cables and interconnects.

The NCF Booster & NCF Booster Signal will take your system to the next level, enhancing clarity and resolution and delivering a more defined soundstage - all for the finest Furutech Pure Transmission signal imaginable.

Nano Crystal² Formula - Nano Crystalline, Ceramic and Carbon Powder

Incorporated into selected Furutech products, NCF features a special crystalline material that has two 'active' properties. First, it generates negative ions that eliminate static. Second, it converts thermal energy into far infrared. Furutech combines this remarkable material with nano-sized ceramic particles and carbon powder for their additional 'piezoelectric effect' damping properties. The resulting Nano Crystal² Formula is the ultimate electrical and mechanical damping material. Created by Furutech, it is found exclusively in Furutech products.

Features:

- α (Alpha) Pure-Copper Rhodium-plated Conductor
- Earth (Ground) Jumper System (US Patent No.: 6,669,491/ European:EP1445837)
- Nylon/fiberglass body with a special anti-resonance nano-sized crystalline, piezo ceramic particles and carbon damping material
- Specified for cable diameters from 6mm to 20mm
- Metal cable clamp improves grip and reduces mechanically and electrically induced distortion
- Rating:
FI-50 NCF --- 15A 125V / 10A 250V AC
FI-50M NCF --- 15A 125V AC
FI-52 NCF --- 20A 125V / 250V AC
FI-52M NCF --- 20A 125V AC

NCF Piezo Ceramic Series AC Connectors • A Furutech First!

Furutech's Pure Transmission FI-50 NCF Piezo Ceramic series connector bodies and housings feature several breakthrough construction techniques.

A multilayer nonmagnetic stainless steel and silver plated carbon fiber shell incorporates a special damping and insulating acetal copolymer. Furutech settled on stainless and silver plated carbon fiber for the outer housing after extensive listening sessions with Japanese industry figures and audiophiles.

The body of the connectors incorporates NCF damping material: Nano Crystal² Formula - Nano Crystalline, Ceramic and Carbon Powder. Nano Crystal² Formula eliminates static, "interconverts" thermal, mechanical and electrical energy and damps vibrations—all for the finest Furutech Pure Transmission signal imaginable.

Furutech new NCF power products manifest a devotion to best performance in every element of AC and signal transfer. Considering that what you actually hear is in a very real sense the direct product of the incoming AC then the final few feet are of prime importance for best performance.

Of course everyone would love to make pure-copper receptacles, but its malleability – lack of stiffness – makes pure copper a poor choice. That's why you'll find phosphor bronze or brass in most receptacles and schuko sockets. Furutech's intense engineering scrutiny has resulted in an industry-first, a technique allowing us to use specially designed rhodium-plated α (Alpha) pure copper conductors that will keep a firm grip yet won't damage male connector blades or their plated surfaces. But what really sets these receptacles and sockets apart is "NCF" – Furutech's ultimate damping material - Nano Crystal² Formula eliminates static, "interconverts" thermal, mechanical and electrical energy and damps vibrations. Furutech NCF power products can be summed up in a word; virtuoso!

Flux-50 NCF Filter

For connection between power cables and power distributors or power cables and components. Eliminate and prevent radiated AC noise

- Fitted with Furutech's top-of-the-line Nano-sized Crystalline Piezo Ceramic rhodium-plated α (Alpha) nonmagnetic FI-50R NCF connector
- Floating Field Damper (Earth/Ground Jumper System)
- (US Patent No.: 6,669,491/European Patent (EP1445837))
- Patent-pending metal cable clamp improves grip and reduces mechanically and electrically induced distortion
- α (Alpha) conductor shield for protection against radiated noise
- Special Audio grade PE insulation contributes to reduced capacitance
- Filter held in housing with resonance damping Piezo epoxy

105.1 NCF

This combination of carbon and NCF and Neo Damper will be the final touch to your complete AC chain.

New Improved Outlet Cover for GTX-D NCF / GTX-D / FPX series duplex receptacle designs
Stainless Fixed Screw/Size M4 X 12mm (L)
Cover /Size: 72.6X117.1 mm ± 0.2mm (T: 4.5mm ± 0.2mm)

GTX-D NCF GTX-S NCF

Furutech's Top-Tier AC Receptacle

- Rhodium-plated α (Alpha) Pure Copper Conductor (0.8mm) Nonmagnetic stainless conductor spring system
- Body material: Nylon/fiberglass with a special anti-resonance nano-sized crystalline, piezo ceramic particles and carbon damping material
- Cover material: Polycarbonate with a special anti-resonance nano-sized crystalline material "NCF"
- Specified for wire diameters of 4mm (set screw)
- Dimensions: 104.0 mm (L) x 47.2 mm (W) x 28.0 mm (H)
