DF-2 LP Flattener • New for 2008!

DF-2 FLATTENS WARPED LPs INCLUDING NO-BEAD 180gm VINYL!

Every vinyl enthusiast has records in their collection, or come across LPs they'd love to own, that were just too warped for any cartridge/arm to track. The DF-2 is the one-stop, one-button solution to your problems! The DF-2 provides controlled-heat perfect flattening for all your warped records, even those with only slight irregularities just enough to unsettle your cartridge causing mistracking.

Warps and Listening

Warps are bad no matter how you look at it. If the arm/cartridge remains parallel to the LP's surface as with a flat record, VTA (Vertical Tracking Angle) remains the same throughout every rotation. Additionally, as the arm/cartridge tracks a warp on its upside, it places greater pressure on the stylus which changes VTF (Vertical Tracking Force) until the peak of the warp where the cartridge is suddenly unloaded" with too little VTF on its way down.

Of course, all this muddles the sound, changing the tonal quality, high- and low-frequency response, affecting imaging and soundstage characteristics. A flat record also tracks significantly better with less audible distortion.

The DF-2 takes up no room at all with its space-saving, vertical storage design. Improved film heating technology optimizes the entire heating and cooling cycle for a perfectly flat LP that you and your cartridge will love!

"Now that I have one in my arsenal, it's great to haggle with used record store owners, exclaiming how warped ... the record is!"

-- Jeff Dorgay, *ToneAudio.com*

The DF-2 is more versatile than ever: It stores vertically, operates horizontally, and now flattens 180gm beadless LPs. As the DFV-1, it's a model of simplicity to use. Place on a level, stable surface, power it, and then unlock both transport latches. Opening the top of the clamshell heating plates, simply place the LP on the center spindle. Close gently, power up the unit, and tap a single button! An LCD display keeps you informed of progress, taking between 1.5 and 2.5 hours total, a tone signaling when done.

Rating 115V ± 10% AC Line 2A fuse
European model 230V ± 10% AC Line 2A fuse
Energy Consumption 100W (max) 25W (Norm)
Heating plate maximum temp. 65°C
Size: 445mm/17" W x 117mm/20" H x 547mm/7" D • Weight: 11kg/20lbs approx.

Safe Usage Environment:
Humidity 20% - 90% (No condensation)
Temperature: 5C/41F – 35C/95F

Manufactured for Furutech by ORB High End Systems of Japan

The Critics Speak

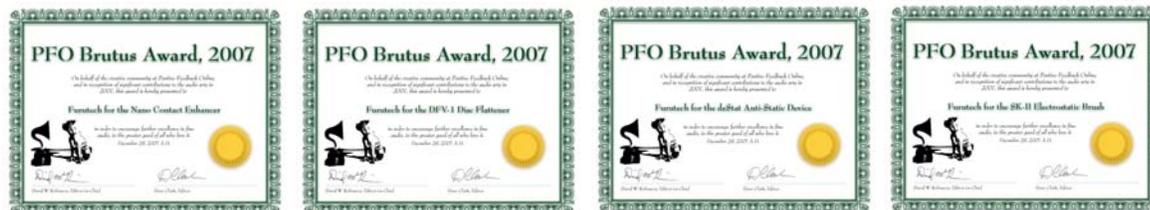

"Furutech Saves the Day! [The DFV-1 and DeMag are] Two must have accessories for the hardcore vinyl enthusiast! At this pace ... the DFV-1 will have paid for itself by the end of the year. Those of you with voracious appetites for vinyl will find this little gadget indispensable."
--Jeff Dorgay, ToneAudio.com

"After a session with the DFV-1, it was flat!"
-- Michael Fremer, Stereophile October 2007

"The Furutech DFV-1 performed exactly as advertised ... I wouldn't change a thing about it"
-- John Potis, 6moons October 2007

"The DFV-1 flattened any warped LP I threw at, no matter the weight or warping ... without damaging the LP in any way I could see or hear"
-- John Crossett, Soundstage September 2007

Winner of Four Positive Feedback Online Brutus Awards for the deStat, the DFV-1 LP Flattener, the Select Series SK-II Antistatic Brush and Nano Fluid Contact Enhancer!
