Make A More Powerful Connection With Furutech Pure Transmission Technology

## ***La Source 101***

***Long headshell leads***

### ***Furutech La Source Pure Silver LP Headshell Leads***

Furutech Co., Ltd., manufacturer of refined analog and digital audio and video cable and accessories brings to market an analog accessory that analog fans need but few make well. Furutech lavished all its engineering resources on creating these new Headshell Leads. The La Source 101 Long Headshell Leads join the Monza LP Stabilizer in the latest of Furutech's analog product releases.

#### ***La Grande Épreuve***

Grand Prix racing's single focus: Testing the absolute limits of technology and performance for that final 10<sup>th</sup> of a second that makes the difference between victory and also-ran. Furutech builds each and every cable in their line the same way; optimized engineering solutions applied to advanced materials and processes, backed by utterly meticulous build quality.

Phono cartridge output is vanishingly small and easily polluted by RFI and EMI. Every element of signal transfer must be perfectly engineered to avoid distortion that robs music of life. If you're going to the trouble of playing vinyl why swamp the low-level signal in a veritable soup of noisy distortion right at its source!

All enthusiasts are looking for the same qualities: Verisimilitude to the original event, a sense of engagement promoting suspension of disbelief, an immersion in the audio and video experience. To engage without effort requires meticulous preparation of the entire playback chain especially including cables and most importantly right at the signal source.

#### ***La Source 101 Long Headshell Leads***

La Source Short and Long Silver Headshell Leads achieve their remarkably quiet soundstage and transparent presentation with pure silver conductors, four-layer shielding and an external ground, even a specially engineered cable clamp to improve grip and avoid mechanical distortion.

**La Source 101 Long Headshell Leads:**

- $\alpha$  (Alpha) pure-silver conductors 0.16mm x7pc stranded wire (26 AWG)
- $\alpha$  (Alpha) custom phosphor bronze rhodium-plated terminations
- Teflon insulation outside diameter approx. 1.0mm
- Approx 2.5±0.1mm diameter x 43.5± 0.5mm overall length

**Pure Transmission F1 Full-Contact Connector Technology**

*$\alpha$  (Alpha) Conductor Is Composed Of Fine OCC Wire Strands*

*Treated With Furutech's  $\alpha$  (Alpha) Cryogenic and Demagnetizing Process*

Electrical Properties		Test Method
Max. Conductor Resistance	8.975 $\Omega$ /km	JISC3005 4.4 20°C
Min. Insulation Resistance	1x10 <sup>10</sup> M $\Omega$ · km ↑	JISC3005 4.7.1 20°C
Dielectric Strength	AC. 1000 V/1 min.	JISC3005 4.6 a
Capacitance	104.37 PF/m	at 1 KHz
Impedance	66.79 $\Omega$	at 200 KHz

Furutech was honored with a Best of Innovations 2009 award for what may be the most sophisticated and thoroughly engineered AC connectors in the world, the FI-50 Series, now standard equipment on the Furutech Piezo Powerflux AC cord. Read more about them here.

Furutech make other award-winning analog accessories like the DF-2 LP Flattener, the celebrated DeMag, the DeStat, the SK-II LP Brush, and the Ag-12 Phono Cable of which Michael Fremer recently wrote: "The award for best performance and highest build quality at the lowest price goes to the Furutech AG-12."
