

Parts	NEW – CF-201 Plus NCF(R)	NEW – CF-202 Plus NCF(R)	Original	Betterment description
Center conductor			<p>CF-201 NCF(R) CF-202 NCF(R)</p> 	<p>Increase in the inner diameter of the Body, accompanied by a modification in the thickness of the end of the center conductor.</p> <p>Optimization with a damping ring and transition to a grooved center conductor, exclusive to CF-201 Plus NCF(R).</p>
Damping ring		N/A		<p>The inner diameter at the contact point with the center conductor has been altered to feature two bumps.</p>
Body			<p>Transformation of the Body from two pieces to one piece, enhancing structural strength and streamlining assembly processes.</p> <p>Adjustment of the inner diameter from 5.7mm to 7.2mm, enabling an increase in specified wire diameters from 5.5mm to 7.0mm.</p>	
Clamp			<p>Outer diameter modification of the Clamp, shifting from 5.4mm to 6.9mm due to the inner diameter change of the Body.</p>	
Color ring			<p>Alteration in the thickness of the color ring, from 1.0mm to 1.5mm, facilitating easier identification of the color.</p> <p>With improvements in the body, a change in the assembly position of the color ring.</p>
